THAT IS ABOUT TO CHANGE.

If you purchase a private insurance plan through Cover Oregon, you may qualify for tax credits to help cut the cost of your insurance.

These credits reduce the amount you pay for insurance each month, or reduce the tax you owe to the Internal Revenue Service (IRS) at the end of the year. If you do not owe any taxes, you can get a bigger IRS refund.

YOU MUST BUY YOUR HEALTH INSURANCE THROUGH COVER OREGON TO QUALIFY.
HOW MUCH HELP WILL I GET?

The amount of the tax credit you receive depends on your family income and your family size. Those who earn the least get the most help.

HOW CAN I BE SURE TO TAKE THE RIGHT CREDIT?

If you take the tax credit in advance, changes to your family size or income—or even a new job that offers health insurance—could mean you are getting the wrong amount of tax credit. To make sure you get the right amount now and do not receive an overpayment that you will have to pay back, contact Cover Oregon when your situation changes:

WHAT IF MY INCOME CHANGES EACH MONTH?

You may want to take a partial credit. Your monthly premiums will still be lower, but not by as much. By taking the rest of your credit at tax time, you will have less chance of owing a repayment.

WHAT IF MY NEW JOB OFFERS HEALTH INSURANCE?

Call Cover Oregon. You may not be eligible for a tax credit once your new coverage begins.
Through Cover Oregon, there are two other ways to get help paying for health coverage. You can find what types of financial help you and your family are eligible for when you complete Cover Oregon’s single online application.

**COST-SHARING ASSISTANCE**

If you buy a plan through Cover Oregon, you may also qualify for help paying for health care services, such as doctor’s visits. This is known as “cost-sharing assistance.”

**What Is Cost Sharing?**

Cost sharing happens when your health coverage pays for some of your health care costs and you pay the rest. You and your plan “share” the costs. For example, if you have a $100 medical bill, your plan might pay $80 and you could pay $20.

If you qualify for cost sharing through Cover Oregon, you may get help paying your share of the following expenses for covered health services:

- **Deductibles:** A deductible is the amount an individual or family must pay to the provider for health care services before the carrier begins to pay the provider for those services. The deductible may not apply to all services.

- **Copays:** A copayment, sometimes called a “copay,” is a fixed dollar amount—for example, $15—an insured person pays for a covered health care service. The amount can change depending on the type of service.

- **Coinsurance:** Coinsurance is the insured individual’s share of costs of a covered health care service, calculated as a percent—for example, 20 percent—of the allowed amount for the service after the insured person meets the deductible. The plan pays the rest of the allowed amount.

In other words, if you qualify for cost-sharing assistance, your plan will have lower deductibles, copays and coinsurance.

**Who Qualifies for This Assistance?**

You might qualify if you are an individual earning up to $29,275 a year or a family of six earning up to $78,975. You might qualify for both tax credits to help you afford your premiums—discussed earlier in this booklet—and cost sharing to pay for medical expenses.
OREGON HEALTH PLAN AND HEALTHY KIDS

The Oregon Health Plan and Healthy Kids are Oregon’s Medicaid programs. They are opening to more adults and children from households that earned too much to qualify for Medicaid in the past. You may be eligible for this no-cost coverage even if you have never qualified for a public program before.

- **Who Is Eligible:** Individuals earning up to $15,856 a year or all members of a family of six earning up to $43,594 might qualify. Families who earn more—up to $94,770 for a family of six—might be able to enroll their children in the Healthy Kids program, available through the Oregon Health Plan.

- **Coordinated Care:** The Oregon Health Plan offers coverage that includes preventive care, primary care doctors, checkups, mental health treatment, some dental and vision benefits, and management of chronic conditions.
